

The `mkessler-hypersetup` package

Maximilian Keßler

October 19, 2023

Abstract

This is just a quick wrapper around the `hyperref` package and - optionally - the `cleveref` package.

1 Usage

The package provides one option: `cleveref`. When given, `cleveref` is also loaded.

The package loads `hyperref` at the end of the preamble, and (optionally), `cleveref` afterwards. This ensures proper loading order of these packages.

Additionally, we provide some default settings that are shown in [Table 1](#).

Key	Value
<code>colorlinks</code>	<code>none</code>
<code>citecolor</code>	<code>violet</code>
<code>urlcolor</code>	<code>blue!80!black</code>
<code>linkcolor</code>	<code>red!50!black</code>
<code>pdftitle</code>	<code>\@course</code> if defined, else <code>\@title</code>
<code>pdfauthor</code>	<code>\@author</code>
